

INDUSTRIAL ACCIDENT STATISTICS, QUEENSLAND, DECEMBER QUARTER 1967

Details of industrial accidents are extracted from claims for workers' compensation finalised or becoming three years old during the quarter. They do not refer to accidents actually occurring within the period.

The Workers' Compensation Department of the Queensland State Government Insurance Office is the only body authorised under the provisions of "The Workers' Compensation Acts, 1916 to 1966" to issue industrial accident policies in Queensland. Claims made on this Department are therefore the sole source of information on compensative industrial accidents.

However, while all employers must insure their employees, not all industrial accidents are covered since, under the Compensation Acts, self-employed persons are not obliged to insure and hence a number of accidents to workers in primary industry, the professions, etc. are not recorded. Similarly, members of the Police Force and the Commonwealth Public Service, including the P.M.G.'s Department, are excluded by the provisions of the Act and coverage is thereby restricted in the administrative and communications industries.

By definition, the scope of the collection is limited to include only those injured employees who lost at least a full shift from work as a result of the accident. This publication excludes particulars of accidents occurring during recess periods or on the journey to or from work and of occupational diseases which are published annually only.

Definitions

An Industrial Accident is defined as any compensated work injury or a compensated occupational disease causing death or permanent disability, or the temporary disability of the injured person during the entire interval corresponding to the hours of his or her regular shift on any one or more calendar days subsequent to the date of the injury. Details of work injuries only are given in the following tables.

Fatal injuries are so classified regardless of the time intervening between injury and death, providing that death occurs within three years of the intimation of the claim.

Permanent Disability is an injury or disease which does not cause death but which results in the complete loss or loss of use of any member or part of a member of the body, or any permanent impairment of functions of the body or part thereof.

Temporary Disability is any injury which does not result in death or permanent impairment, but which renders the injured person unable to perform a regularly established job during the entire time interval corresponding to the hours of a full regular shift.

Agency Related to the Accident is the agency (i.e., work conditions, production equipment, or persons, animals, etc.) which because of its hazardous nature or condition precipitated the event designated as the accident.

Type of Accident is the event which directly resulted in the injury (i.e., the manner in which contact was made between the injured person and the object or substance causing the injury).

Duration of Temporary Disability refers to the calendar period of incapacity (not to the actual working period lost).
